Note: The number of current DOI Monuments is now 123.

**Notes:**

The "National Monuments Data" tab includes National Monuments that were established under other Federal Agencies (such as NOAA, and Forest Service). These monuments were included in this data call as a number of the monuments have been transferred between DOI and the Forest Service. The data is sortable, which allows for different views (such as including or excluding the Forest Service National Monuments).

National Monuments that were abolished or re-designated as a National Park, Refuge, Preserve, or Seashore or transferred to an external agency are also included in this data call. See column B in the "National Monuments Data" tab for DOI Bureau name (or other non-DOI agency name) and latest designation (if no longer a National Monument).

Per BLM, courts give deference to BLM and the Resource Objects and Values (ROV's) that are further defined by BLM through NEPA, in addition to the more general nature of the Proclamation language. For reference, the BLM ROV's are included in the "National Monuments Data" tab under Column K for each BLM managed National Monument.

## DOI National Monuments - Data Call

3/15/2017

NPS	Buck Island Reef National Monument	Virgin Islands	St. John	1961	Antiquities Act	50.00	1	015.47	Proclamation 3443, December 28, 1961. While Buck Island and its adjoining shoals, rocks, and undersea coral reefs formations possess one of the finest marine gardens in the Caribbean Sea and while these lands and the related features are of great scientific interest and educational value to students of the sea and to the public and while the sunken quarries and the area near the wharves are dependent upon it as a subject to constant study of commercial exploitation and destruction and while the Advisory Board on National Parks, Historic Sites, Buildings and Monuments, expressed by the call for scientific importance of the coral reefs of Buck Island, has urged the prompt protection to prevent further despoliation and while the scientific interest to preserve the sea of outstanding scientific, aesthetic, and educational importance for the benefit and enjoyment of the people.
NPS	Cabrillo National Monument	California	San Diego	1913	Antiquities Act	0.50		159.94	Established under War Department. Transferred to NPS in 1933. AND WHEREAS, when Cabrillo sailed into San Diego Bay on the 28th day of September, 1542, Point Loma was the first sighted and The Order of Panama, an organization composed of representatives of citizens of Southern California, has applied for permission to construct a historic statue of Juan Rodriguez Cabrillo, the discoverer of California, on Point Loma which lies within the military reservation of Fort Rosecrans, California, and has requested that a suitable site be set aside for such monument.
BLM	California Coastal National Monument	California	Maine	2000/2014/2017	Antiquities Act	3,937.00		0	Proclamation 7364, January 11, 2000. The islands, rocks, and pinnacles of the California Coastal National Monument over which the waves, as white-capped waves crash into the water, call for deeply carved sea channels and other water empty back into the ocean. Amidst that beauty lies replaceable scientific values vital to protect the fragile ecosystems of the California coast. At land's end, the islands, rocks, exposed reefs, and pinnacles offer the coast above mean high tide provide Havens for significant populations of sea mammals and birds. They are part of a narrow and important flight lane in the Pacific Flyway, a vital and essential habitat for feeding, perching, resting, and shelter. The California Coastal National Monument is a biological treasure. BLM resources, objects and values are further defined through management plans and/or management reports. Including California Resources - Petroleum Open Educational Value - Interpretation Natul Resources - Marine mammals Recreational Value - Wildlife observation on coastal sight seeing Scientific Value - Research
NPS	National Monument	Arizona	Apache County	1931	Congress Proclamation	83,840.00		83,840.00	All on Indian Territory. Authorized by Congress and established through Proclamation. WHEREAS it appears that the public interest would be promoted by including the lands hereinafter described within a national monument for the preservation of a great number of cliff dwellings and for the archaeological interest.
BLM	Canyons of the Ancients National Monument	Colorado	Dolores	2000	Antiquities Act	175,160.00		8,630	June 9, 2000. Containing the highest known densities of a chaeological sites in the Nation, the Canyons of the Ancients National Monument holds evidence of culture and traditions spanning thousands of years. This area, with its intertwined natural and cultural resources, suggests landscape, a quality that greatly contributes to the protection of its scientific and historic objects. The monument offers an unparalleled opportunity to observe, study, and experience how culture evolved and adapted over time in the American Southwest. BLM resources, objects and values are further defined through management plans and/or management reports. Including Archeology Geology Rapto Reptiles
NPS	Cape Krusenstern National Monument	Alaska	Kotzebue	1978	Antiquities Act	560,000.00		627,190.67	Proclamation 4615, December 1, 1978. The area of the northwest Alaska known as Cape Krusenstern contains an archeological record of great significance. The Cape's bluffs and terraces of one hundred four thousand year old beach ridges hold an archeological record of every major cultural period associated with habitation on the Alaska coast nearly the last 5000 years. The ruggedly shaped lands by the island, including the Kakagrak Hills, the Rabbit Creek area and others, have an older archeological record dating back to pre-Eskimo periods of at least 8000 years ago. This continent of evidence of great historic and scientific importance is the study of human survival and cultural evolution. The area contains examples of other unique natural processes. The climatological conditions are conducive to the formation of Naleds, one spectacular example of which occurs in the area. In the same island area at Klenak Creek, found the only known Alaskan example of a still recognizable Illinoian glacial esker, a formation with which cover 100,000 years old. The unique geological features on and around the mountain in this area created and continue to create the beach ridges which preserve the archeological record of the beach civilizations. Also found in the area is a wide variety of plant and animal species, from the marine life along the shoreline and lagoons to the island populations such as musk-oxen, Dall sheep, caribou and many small species.
NPS	Capulin Volcano National Monument	New Mexico	Capulin	1916	Antiquities Act	640.42		792.84	Established as Capulin Mountain NM then redesignated as Capulin Volcano NM in 1987. WHEREAS, Capulin Mountain, located in Township twenty-nine and thirty North, Range twenty-eight East of the New Mexico Pacific Meridian, New Mexico, is a striking example of recent extinct volcanoes and of great scientific and especially geological interest.
BLM	Carson National Monument	California	Bakersfield	2001	Antiquities Act	204,107.00		35,772.00	Proclamation 7393, January 17, 2001. Full of natural splendor and rich in human history, the magnificent grasslands and steppes in the Carson National Monument contain an exceptional collection of scientific and historic interest. Since the mid-1800s, large portions of the grasslands that once spanned the entire floodplains of the Carson River have been lost to agriculture, urban development, and urban land uses. The Carson National Monument, which is dramatically bisected by the San Andreas Fault zone, is the last undeveloped remnant of this ecosystem, providing crucial habitat for the long-term conservation of the many endemic plant and animal species that still inhabit the area. BLM resources, objects and values are further defined through management plans and/or management reports. Including California Geographical Features San Joaquin Antelope Slope Blunt-nosed leopard mountain plover Longhorn fish shrike Vernal pool fish shrike Nippon moss sphinx moth Le Conte's thrasher Rare and Sensitive Plant species
NPS	Casa Grande National Monument	Arizona	Coolidge	1918	Antiquities Act	480.00		472.50	Casa Grande Ruins Reservation was set aside by President Benjamin Harrison on June 22, 1892, to protect the "Casa Grande" or Great House, a multi-storied, earthen-walled structure surrounded by the remains of smaller buildings and a compound wall. The Great House was constructed by the Hohokam people, who farmed the Gila Valley of south-central Arizona from AD 300-1450. Casa Grande Ruins Reservation was both the largest historic site to be set aside by the United States government. The site became a national monument on August 3, 1918, under the authority of the Antiquities Act and was transferred to the National Park Service on that date.
BLM/Bureau of Reclamation (USBR)	Cascade-Siskiyou National Monument	Oregon	Medford	2000/2017	Antiquities Act	52,000.00		100,000	Proclamation 7318, June 2000. With towering forests, sunlit oak groves, wildflower-strewn meadows, and steep canyons, the Cascade-Siskiyou National Monument is an ecological wonder, with biological diversity unmatched in the Cascade Range. This enclave of natural resources is a biological crossroads—the interface of the Cascade, Klamath, and Siskiyou ecoregions, an area of unique geology, biology, climate, and topography. The monument is home to a spectacular variety of rare and beautiful species of plants and animals, whose survival in this region depends upon its continued ecological integrity. Proclamation 7318 (revised 2017) hereby proclaims the objects identified above that are situated upon lands and interests in lands owned or controlled by the Federal Government to be part of the Cascade-Siskiyou National Monument and, for the purpose of protecting those objects, preserve as part of the eolal lands and interests in lands owned or controlled by the Federal Government within the boundaries described on the accompanying map, which is attached hereto and forms a part of this Proclamation. These reserved Federal lands and interests in lands encompass approximately 48,000 acres. The boundaries described on the accompanying map are confined to the smallest area compatible with the proper care and management of the objects to be protected. Nothing in this Proclamation shall change the management of the area protected under Proclamation 7318. To the extent that the Proclamation shall have the same meaning as those defined in Proclamation 7318. BLM resources, objects and values are further defined through management plans and/or management reports. Including Good Leaf Deciduous Trees and Shrubs Diverse Vegetation and Biological Richness Ecological Integrity Mosaic of Plant Communities Natural Ecosystem Dynamics Natural Processes Old Growth Habitat Range of Fauna Rare and Endemic Plants Special Plant Communities
NPS	Castillo San Marcos National Monument	Florida	Fort Marion	1924	Antiquities Act	18.51		19.31	Established as Ft. Marion NM in 1924, transferred to NPS in 1933 and redesignated Castillo San Marcos NM in 1942. AND WHEREAS, by section 2 of the Act of Congress approved June 8, 1906 (34 Stat. 225) the President is authorized to declare by public Proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be National monuments, and may reserve as a part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected
NPS	Castle Clinton National Monument	New York	New York	1946	Congress	1.00			Authorized in 1946 and established in 1950 when land was ceded to Federal Government. War of 1812 Memorial. Belonged to the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is authorized to accept, on behalf of the United States, title to the site, comprising approximately one acre and situated in Battery Park, New York City, of the historic structure known as Castle Clinton, together with such structures and any other improvements on or appurtenant to such site.
NPS	Castle Mountains National Monument	California	Baileys	2016	Antiquities Act	20,920.00		20,902.00	February 12, 2016. The Castle Mountains area, bounded on the east by Mojave National Preserve (Preserve), possesses outstanding natural, cultural, and historic values representing some of the finest characteristics of the eastern Mojave Desert. It connects water flow and wildlife corridors of the Preserve, and completes the boundary of the Preserve along the California-Nevada border. Beneath the shadow of the Painted Hills, the area is a rich cultural and historic resource, including Native American archaeological sites and the historic gold mining ghost town of Hawthorne. Exposed geological features contribute to the area's outstanding scenery. Shaped by millions of years of geological forces, the rugged Castle Mountains are emblematic of the Mojave landscape.
NPS	Cedars of Lebanon National Monument	Utah	Cedar City	1933	Antiquities Act	5,701.39		6,154.60	The historic site of the Cedar of Lebanon was designated on June 19, 1905, when it was included as a part of the Sevier (now Dixie) National Forest and was administered by the Forest Service of the U.S. Department of Agriculture. The area was established as a National Monument by Presidential Proclamation on August 22, 1933, and was placed under the administration of the National Park Service of the U.S. Department of the Interior. WHEREAS it appears desirable, in the public interest, to exclude certain lands from the Dixie National Forest, Utah, and include said lands within a national monument for the preservation of the spectacular cliffs, canyons, and features of scenic, scientific, and educational interest contained therein

	NPS	Rainbow Bridge National Monument	Utah	Lake Powell	1910	Antiquities Act	160.00			WHEREAS, an extraordinary natural bridge, having an arch which spans 100 feet and appears as much like a rainbow, and which is the highest and most beautiful of its kind in the world, and is situated on the south side of the Colorado River, and is of great scientific interest as an example of recent geological action, and it appears that the public interest would be promoted by reserving this bridge as a National Monument, together with as much land as may be needed for its protection	
	NPS	Reconquista National Monument	South Carolina	Beaufort County	2017	Antiquities Act	3.20			The Reconquista National Monument was established by Executive Order on January 1, 1917, and was the first of a series of monuments established by the President. The monument was established to protect the remains of the Spanish colonial settlement of San Juan de los Rios, which was founded in 1565. The monument was established to protect the remains of the Spanish colonial settlement of San Juan de los Rios, which was founded in 1565. The monument was established to protect the remains of the Spanish colonial settlement of San Juan de los Rios, which was founded in 1565.	
	BLM	Rio Grande del Norte National Monument	New Mexico	Taos	2013	Antiquities Act	242,555.00	68,020.00		Ma-chi-25, 2013. In fact, the new Mexico, the Rio Grande and the San Juan River flows through a deep gorge at the edge of the state and sweep the expanse of the Taos Plateau. Volcanic cones, including the Cerro de la Olla, Cerro San Antonio, and Cerro del Yuta, sit up from the surrounding plateau. Canyons, volcanic cones, wild rivers, and native grasslands have vital wildlife habitat, unique geological resources, and remnants of human passage through the landscape over the past 10,000 years. This extraordinary landscape of extraordinary beauty and dramatic diversity is known as the Rio Grande del Norte, and is extraordinary for its scientific and historic resources. BLM resources, objects, and values are further defined through management plans and/or management reports. Including Cultural Resources. Ecology. Diversity. Resources. Geological Resources. Wildlife Resources.	
Partially	FWS & NOAA	Rose Atoll Marine National Monument	Pacific Ocean (American Samoa)		2009	Antiquities Act	8,609,045.00			P. 01/20/2013. January 16, 2009. In the Pacific Ocean approximately 130 nautical miles east-southeast of Pago Pago Harbor, American Samoa, lies Rose Atoll—the easternmost Samoan island and the southernmost part of the Line Islands. This small atoll, which includes the Rose Atoll National Wildlife Refuge with about 20 acres of land and 1,600 acres of lagoon, contains one of the most pristine atolls in the world. The islands, submerged lands, waters, and marine environment around Rose Atoll support a dynamic reef ecosystem that is home to a wide variety of seabirds and marine species, many of which are threatened or endangered.	Pursuant to Presidential Proclamation 8337 and Secretaries of the Interior and State 3284 (as amended 8/31/2016), FWS manages the monument submerged lands and waters in consultation with NOAA and the American Samoa government. NOAA has management responsibilities for the seaward extent of the perimeter of a National Marine Sanctuary.
	NPS	Russell Cave National Monument	Alabama	Bartholomew	1961	Antiquities Act	310.45			P. 01/20/2013. May 11, 1961. Whereas Russell Cave, in the State of Alabama, is recognized by scientists to contain outstanding archeological and ethnological evidences of human habitation in excess of 8,000 years, and Whereas the Advisory Board on National Parks, Historic Sites, Buildings and Monuments, expressed by the scientific importance and educational value of Russell Cave, has recommended that the cave be permanently preserved as a unit of the National Park System and Whereas Russell Cave and adjacent adjoining properties have been donated by the National Geographic Society to the American people for preservation as a national monument.	
	NPS	Salinas Pueblo Multiple National Monument	New Mexico	Mountain	1909	Antiquities Act	160.00	985.13		Established as G. An Quiv. NM in 1909 and redesignated Salinas Pueblo Multiple National Monument in 1988. WHEREAS, one of the largest and most important of the early Spanish colonial ruins, commonly known as the G. An Quiv. ruins, together with numerous Indian pueblos ruins situated in Socorro County, Ma-chi-25, 2013. Within Washington State's Puget Sound lies an archipelago of over 450 islands, rocks, and promontories known as the San Juan Islands. These islands form an unmatched landscape of contrasts, where forests seem to sprout from jagged and distant, snow-capped peaks provide the backdrop for sandy beaches. Numerous wildlife species can be found here, thriving in the diverse habitats supported by the islands. The presence of a chevron of scientific sites, historic lighthouses, and a few light-houses communities testifies that humans have navigated this rugged landscape for thousands of years. These lands are a refuge of scientific and historic resources and a class room for generations of Americans. BLM resources, objects, and values are further defined through management plans and/or management reports. Including Diversity and Habitats. Historic Lighthouses. Native American Sites. Wildlife.	
	BLM	San Juan Islands National Monument	Washington	Lopez Island	2013	Antiquities Act	970.00			Feb. 12, 2016. The Sand to Snow area of southern California is an ecological and cultural treasure, a mosaic of the great geological diversity of the region. Rising from the floor of the Sonoran Desert to the tallest peak in southern California, the area features a remarkable diversity of plant and animal species. The area includes a portion of the San Bernardino National Forest and connects to the area of Joshua Tree National Park to the east, knitting together a mosaic of spectacular landscapes stretching over 200 miles. The mountain peaks of the Sand to Snow area frame the northwestern end of Coachella Valley along with the Santa Rosa and San Jacinto Mountains National Monument to the south. Home to desert oases at Big Morongo Canyon and Whitewater Canyon, the area serves as a refuge for desert dwellers and animals and a stopover for migrating birds. The archaeological riches of the Black Lava Buttes and the historic cultural remains of mining and ranching communities tell of past prosperity and struggle in this arid land. The urban expanse is an invaluable treasure for our Nation and will continue to serve as an irreplaceable resource for archaeologists, geologists, and biologists to generate insights to come. BLM resources, objects, and values are further defined through management plans and/or management reports. Including human history of the area, ecology, plant and wildlife species diversity, desert patterns, habitats, threatened and endangered plants and animals, economic opportunities, scientific research, and other studies.	
Partially	BLM & US Forest Service	Sand to Snow National Monument	California	Palm Springs	016	Antiquities Act	154,000.00	0.00		B. 01/20/2013. January 16, 2009. In the Pacific Ocean approximately 130 nautical miles east-southeast of Pago Pago Harbor, American Samoa, lies Rose Atoll—the easternmost Samoan island and the southernmost part of the Line Islands. This small atoll, which includes the Rose Atoll National Wildlife Refuge with about 20 acres of land and 1,600 acres of lagoon, contains one of the most pristine atolls in the world. The islands, submerged lands, waters, and marine environment around Rose Atoll support a dynamic reef ecosystem that is home to a wide variety of seabirds and marine species, many of which are threatened or endangered.	
Partially	LM & US Forest Service	Santa Rosa and San Jacinto Mountains National Monument	California	Palm Springs	2000/2009	Congress	177,128.00	110,926		B. 01/20/2013. January 16, 2009. In the Pacific Ocean approximately 130 nautical miles east-southeast of Pago Pago Harbor, American Samoa, lies Rose Atoll—the easternmost Samoan island and the southernmost part of the Line Islands. This small atoll, which includes the Rose Atoll National Wildlife Refuge with about 20 acres of land and 1,600 acres of lagoon, contains one of the most pristine atolls in the world. 	NPS	Scotts Bluff National Monument	Nebraska	Gering	1919	Antiquities Act	2,053.83	2,954.21		Scotts Bluff is an important 19th-century geological formation and landmark on the Oregon Trail and Mormon Trail. It contains multiple bluffs on the south side of the North Platte River, but is named after a prominent bluff called Scotts Bluff which rises more than 830 feet above the plains at its highest point. The monument is composed of five rock formations named Crown Rock, Dome Rock, Eagle Rock, Saddle Rock, and Sentinel Rock. WHEREAS Scotts Bluff is the highest known point within the State of Nebraska, affording a view for miles over the surrounding country; WHEREAS Mitchell Pass, lying to the south of said bluff, was the used by the old Oregon Trail and said bluff was used as a landmark and rendezvous by thousands of immigrants and frontiersmen traveling said trail en route for new homes in the Northwest; and WHEREAS, in view of these facts, as well as of the scientific interest the region possesses for a geological standpoint, it appears that the public interests will be promoted by reserving the lands upon which the said bluff and the said pass are located as a national monument.	
	BLM	Sonoan Desert National Monument	Arizona	Phoenix	2001	Antiquities Act	486,149.00	10,000		January 17, 2001. The Sonoan Desert National Monument is a magnificent example of untrammeled Sonoan desert landscape. The area encompasses a functioning desert ecosystem with an extraordinary array of biological, scientific, and historic resources. The most biologically diverse of the North American deserts, the monument consists of distinct mountain ranges separated by wide valleys, and includes the saguaro cactus for est communities that provide excellent habitat for a wide range of wildlife species. The monument's biological resources include a spectacular diversity of plant and animal species and an array of plant and animal species. BLM resources, objects, and values are further defined through management plans and/or management reports. Including Archaeological and Historic Resources. Desert Bush-Bu sage, Desert Grassland, and Washes. Desert Washes. Diversity Plant and Animal Species. Functioning Desert Ecosystem. Saguaro Cactus. Sand Tank Mountains. Scientific analysis of plant species and climate. Wildlife.	
	NPS	Statue of Liberty National Monument	New York	Fort Wood	1924	Antiquities Act	2.50	58.38		Established as Fort Wood under the War Department in 1924. Transferred to NPS in 1933 and redesignated Statue of Liberty NM in 1965. AND WHEREAS, by section 2 of the Act of Congress approved June 19, 1906 (34 Stat. 225) the President is authorized to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and may reserve as a part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects of historic or scientific interest; and Whereas, the Statue of Liberty is situated on Liberty Island, New York City, and is of great historic and scientific interest, and it appears that the public interest would be promoted by reserving this island as a National Monument, together with as much land as may be needed for its protection.	
	NPS	Stonewall National Monument	New York	New York	2016	Antiquities Act	0.12			Stonewall National Monument serves as the first national monument that honors the history of the Lesbian, Gay, Bisexual, and Transgender (LGBT) community in the United States. The site played a pivotal role in the national LGBT civil rights movement. The new monument is located at Christopher Park, a historic community park at the site section of Christopher Street, West 4th Street and Greenwich Street in Manhattan's Greenwich Village. The monument's boundary encompasses approximately 7.7 acres of land, including Christopher Park, the Stonewall Inn, and the surrounding streets and sidewalks that were the site of the 1969 Stonewall Uprising, an event that inspired the modern LGBT civil rights movement.	
	NPS	Sunset Crater Volcano National Monument	Arizona	Flagstaff	1930	Antiquities Act	3,040.00			Established under USFS, transferred to NPS and redesignated in 1993 through 101st Congress. Established by Presidential Proclamation in 1930. Sunset Crater Volcano National Monument protects 1,040 acres of present-day the Colorado Plateau's most recent volcanic eruption. It is the youngest, least-eroded cinder cone in the San Francisco Volcanic Field and represents the only series of eruptions in the Southwest indisputably witnessed by local peoples.	
	NPS	Timpangos Cave National Monument	Utah	American Fork	1922	Antiquities Act	250.00			Established under USFS and transferred to NPS in 1933. The Timpangos cave system is in the Wasatch Range in the American Fork Canyon. The area includes a series of accessible Hansen Cave, Middle Cave, and Timpangos Cave. Many colorful cave features, including helictites, cave bacon, cave columns, flowstone, cave popcorn, and cave drapery. Set aside because of its unusual scientific interest and importance. WHEREAS, a natural cave, known as the Timpangos Cave, which is situated upon unsurveyed lands within the Wasatch National Forest in the State of Utah, of unusual scientific interest and importance, and it appears that the public interest will be promoted by reserving this cave with as much land as may be necessary for the proper protection of the cave as a National Monument.
